TempSure *Vitalia*

# HOW DOES *it work*?

The treatment works by delivering therapeutic heat to the target tissue to temporarily increase local circulation and decrease pain and muscle spasms.

During treatments, the Vitalia handpiece is inserted into the vagina. The handpiece was carefully designed with patient comfort in mind. The entire experience is safe and therapeutic. Treatments usually last less than 30 minutes, making it convenient to schedule during the day. After your appointment, you will be able to return to your routine immediately.

# WHAT DOES THE PROCEDURE *feel like?*

During the **TempSure Vitalia** procedure you will feel gentle heating of the target tissue. The treatment has been carefully designed with you in mind to deliver heat gradually for a comfortable therapeutic experience every time.

# WHAT AREAS CAN I *get treated?*

The **TempSure Vitalia** probe is specifically designed to gently treat your most sensitive areas.

# HOW LONG IS *the procedure?*

The procedure may take less than 30 minutes depending on the area being treated.

Work with your provider to develop a procedure plan that is right for you.

# HOW MANY TREATMENTS *will I need?*

Many patients notice immediate improvements. As the weeks go on, you should experience even better results. This is because collagen production takes time. The number of treatments that are needed will vary. A series of treatments is always recommended, but every patient is different. When you come in for your consultation, we will create a custom treatment plan for you.

IS THIS RIGHT *for me* ?

Treatments are fast, easy and can be performed on all skin types.

# WHAT ARE THE BENEFITS?

Vitalia treatment offers several impressive benefits. Among others, it:

- Increases nerve sensitivity in the vaginal area, significantly enhancing your pleasure during intimacy.
- Tightens the tissue inside your vaginal canal, leading to a more pleasurable intimate experience for both you and your partner.
- Promotes new collagen and elastin growth, enhancing the appearance of vaginal tissue that may have atrophied due to childbirth, hormones, or the natural aging process. Collagen fills in withering areas while elastin restores youthful elasticity.
- Provides relief from urinary incontinence, dramatically reducing or even eliminating such problems.
- Gives you more confidence, both in and out of the bedroom.
